Special Issue

Inelasticity and Damage in Solids Subject to Microstructural Change

In Honour of Lazar M. Kachanov

Edited by Ian Jordaan

TABLE OF CONTENTS

Foreword	IAN J. JORDAAN	vii–viii
Tribute		ix–x
Rupture time under creep conditions	LAZAR M. KACHANOV	xi–xviii
Solids with cracks and non-spherical pores: proper parameters of defect density and effective elastic properties	MARK KACHANOV	1–32
Nonlinear viscoelastic and viscoplastic constitutive equations with growing damage	R.A. SCHAPERY	33–66
A two scale damage concept applied to fatigue	J. LEMAITRE, J.P. SERMAGE and R. DESMORAT	67–81
Application of the crack layer theory to modeling of slow crack growth in polyethylene	A. CHUDNOVSKY and Y. SHULKIN	83–102
Modelling of microsuperplasticity in mechanically alloyed aluminum	W.J.D. SHAW, I.A. GUNEA and M. KUHN	103–111
The microstresses evaluation in piezoelectric polycrystals	V.M. LEVIN	113–123
Creep damage assessment and remaining life evaluation	I. LE MAY and H.C. FURTADO	125–135

An alternating method based on the VNA solution for analysis of damaged solid containing arbitrarily distributed elliptical microcracks	TOSHIHISA NISHIOKA and TETSUJI KATO	137–170
Constitutive behaviour of crushed ice	S.K. SINGH and I.J. JORDAAN	171–187
A solution method for frictional contact problems of a crack in FGMs under mechanical and thermal loads	R. BABAEI and S.A. LUKASIEWICZ	189–208
A broad-spectrum constitutive modeling technique applied to saline ice	E.S. LECLAIR, R.A. SCHAPERY and J.P. DEMPSEY	209–226
Diffusion-induced stresses in solids	M.V. PAUKSHTO	227–236
The effect of constraint on creep fracture assessments	PETER J. BUDDEN and ROBERT A. AINSWORTH	237–247
Burnthrough prediction in pipeline welding	A.S. ODDY and J.M.J. McDILL	249–261
On the influence of wet underwater welding on CTOD-δ_5	L. LINDHORST and O. MAHRENHOLTZ	263–277
Disintegration of ice under fast compressive loading	IAN J. JORDAAN, DMITRI G. MATSKEVITCH and IRENE L. MEGLIS	279–300
The visco-damage mechanical response of swirl-mat composites	L.V. SMITH and Y.J. WEITSMAN	301–319
On damage distribution in the upsetting process of sintered porous materials	A. SHIRIZLY, D. RITTEL, L. RUBINSKI and J. TIROSH	321–336
Air voids reduction phenomena of asphalt concrete – A continuum approach	J. MURALI KRISHNAN and V.R. RENGARAJU	337–354
